What is ShareBIM?

ShareBIM is a BIM-enabled Collaboration Platform which provides a dedicated Common Data Environment (CDE) platform for storage, viewing and sharing of BIM models, drawings, animation, rendering and other related files of the Works. You can easily check and process the documents online, anytime, anywhere. Everyone can easily communicate on the platform and initiate workflows for follow up actions throughout project life cycle.

Key Features:

- BIM-enabled platforms with proven project experience
- Lightweight, fast and easy file transmission
- Modern UX design, easy adaptation

- Revit, Sketchup etc. compatible for easy collaboration
- iOS, Android and Windows compatible
- Flexible, secure and reliable platform
